

UPS Shipping with Quantum View

GENESCO Corporate Logistics has employed the use of a specialized shipping system with UPS called Quantum View. This system was created primarily for use with UPS Worldship; however, other vendor shipping systems can implement the changes.

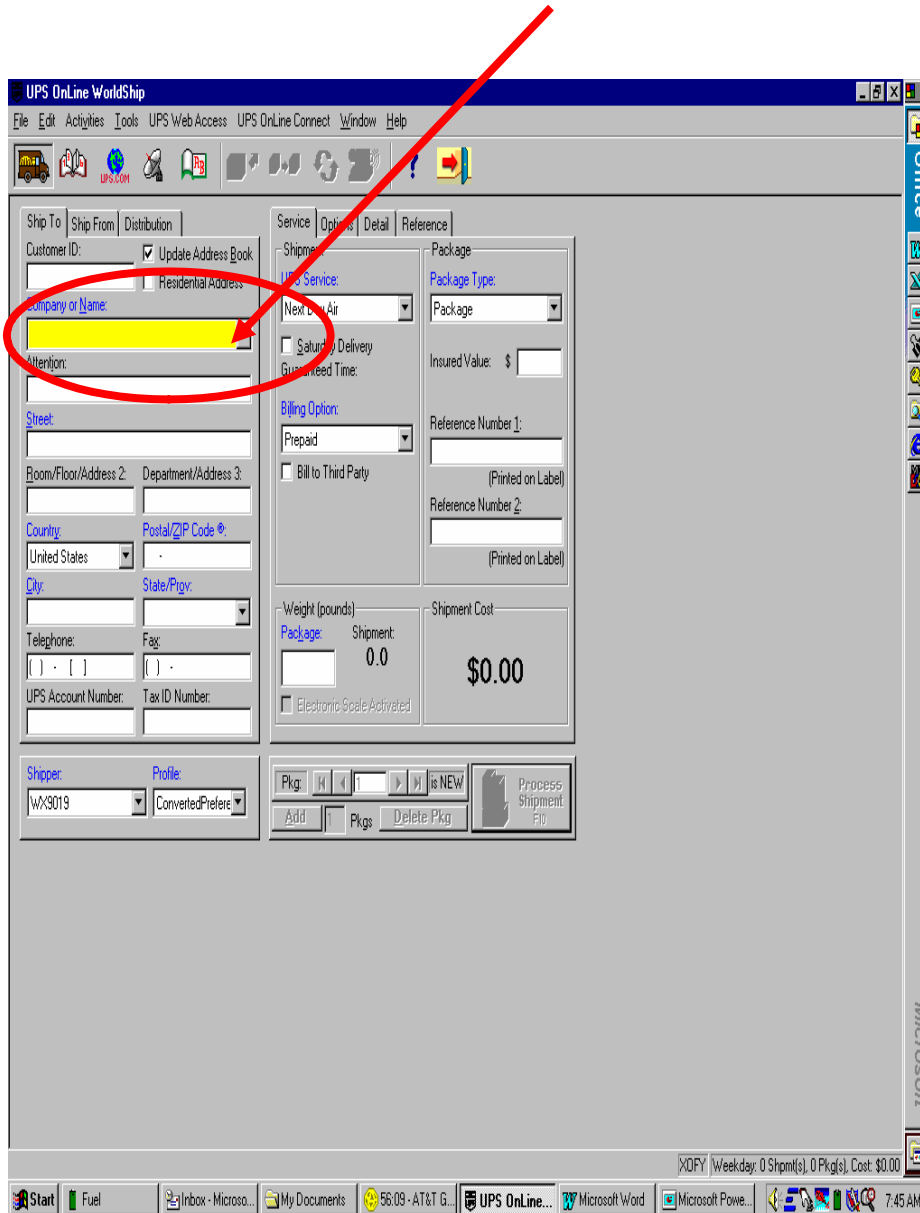

The customer/vendor relationship will be strengthened by the implementation of this system. The system will provide pertinent shipping information, such as tracking numbers to GENESCO. This information will be generated with each parcel shipment.

By using this program vendors will no longer have to furnish GENESCO Corporate Logistics Department with UPS tracking numbers. Additionally, these vendors will be exempt from charge-backs relating to failure to provide tracking numbers.

UPS Shipping with Quantum View

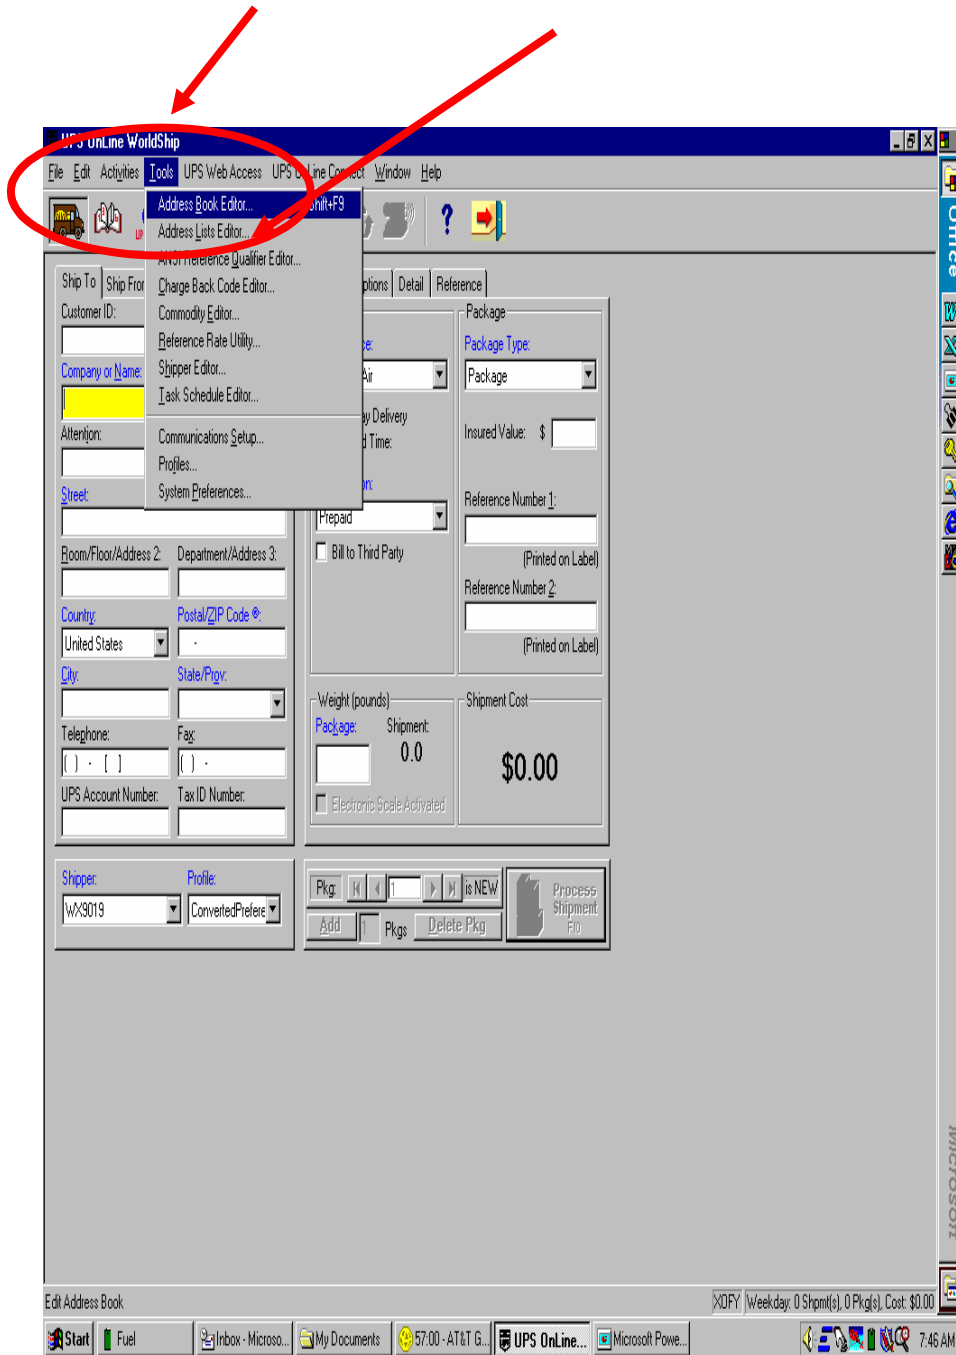

Instruction for Implementing Changes

For Shippers using OLW
How to edit address book
to include **location ID**

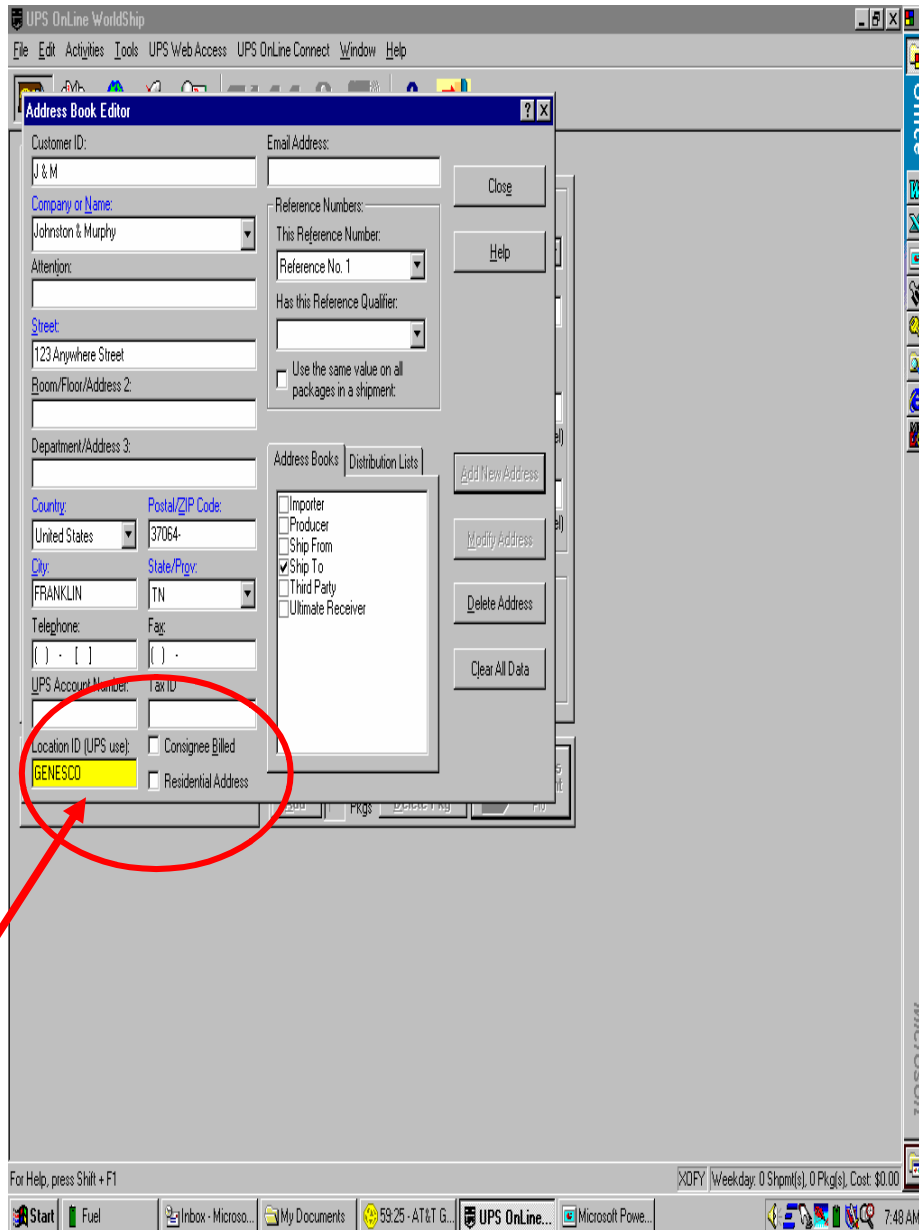

UPS Shipping with Quantum View

Select Tools, then Address Book Editor

UPS Shipping with Quantum View

Select Address to be modified, key GENESCO (all caps) in **Location ID Field**

UPS Shipping with Quantum View

Click Modify Address, this will now save Location ID for this customer.
