

UPS SHIPPING WITH QUANTUM VIEW

GENESCO's Corporate Logistics Department has employed the use of a specialized shipping system with UPS called Quantum View. This system was created primarily for use with UPS Worldship; however, other vendor shipping systems can implement the changes.

The customer/vendor relationship will be strengthened by the implementation of this system. The system will provide pertinent shipping information, such as tracking numbers to GENESCO. This information will be generated with each parcel shipment.

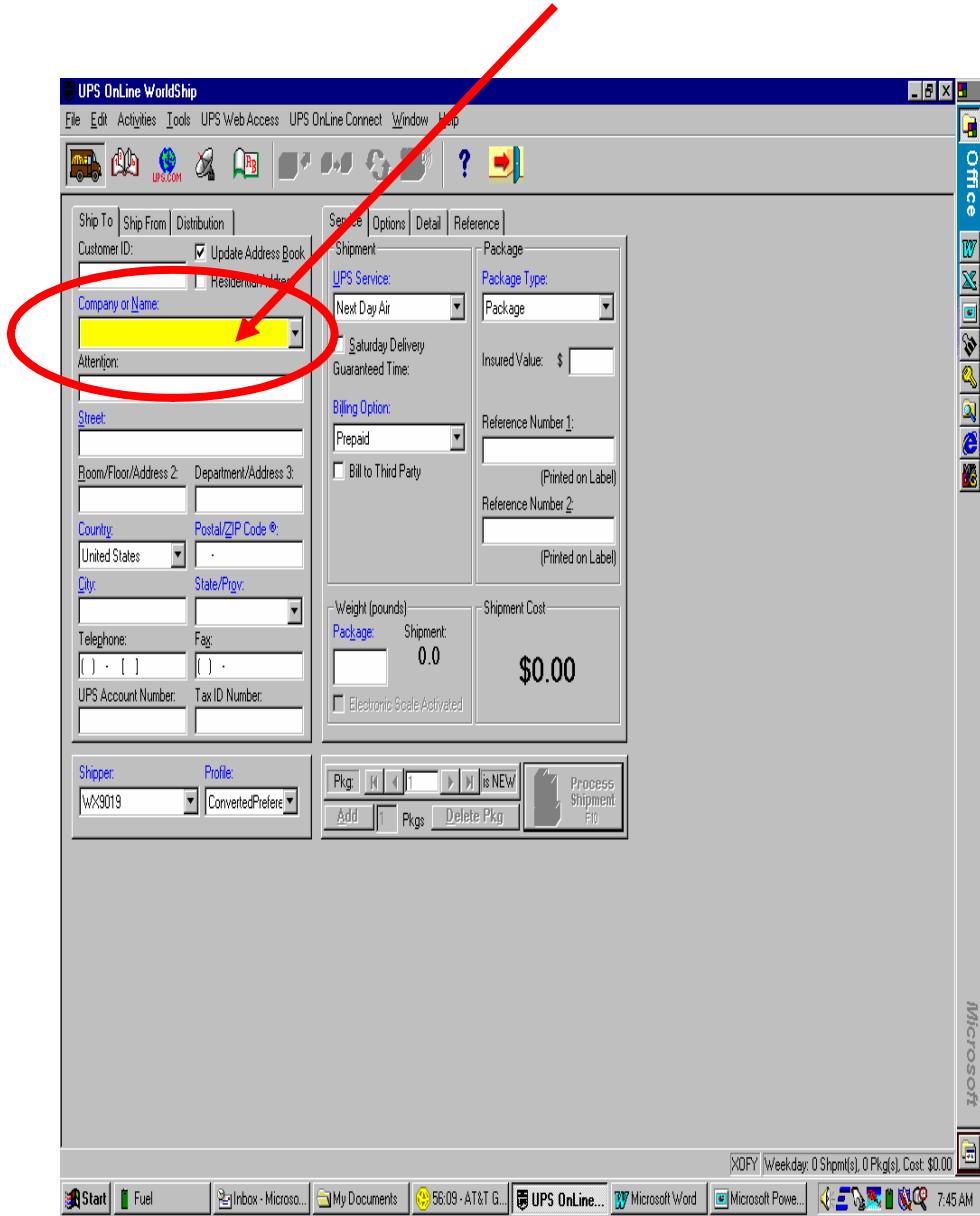

By using this program, shipping according to the instructions given upon authorization, and complying with the reference field requirements, vendors will no longer have to furnish GENESCO Corporate Logistics Department with UPS tracking numbers.

Additionally, these vendors will be exempt from charge-backs relating to failure to provide tracking numbers.

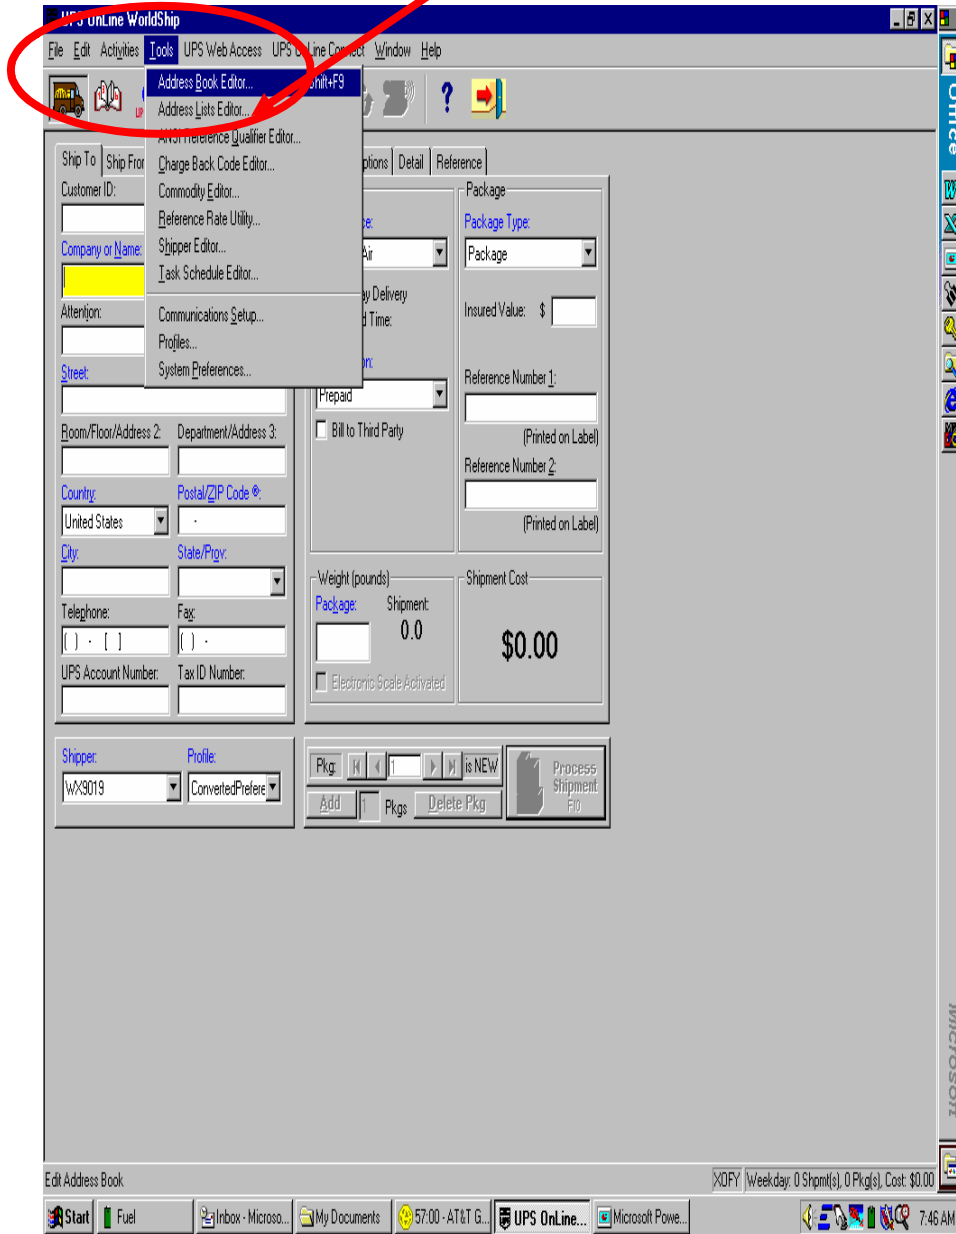

Instruction for Implementing Changes

For Shippers using OLW

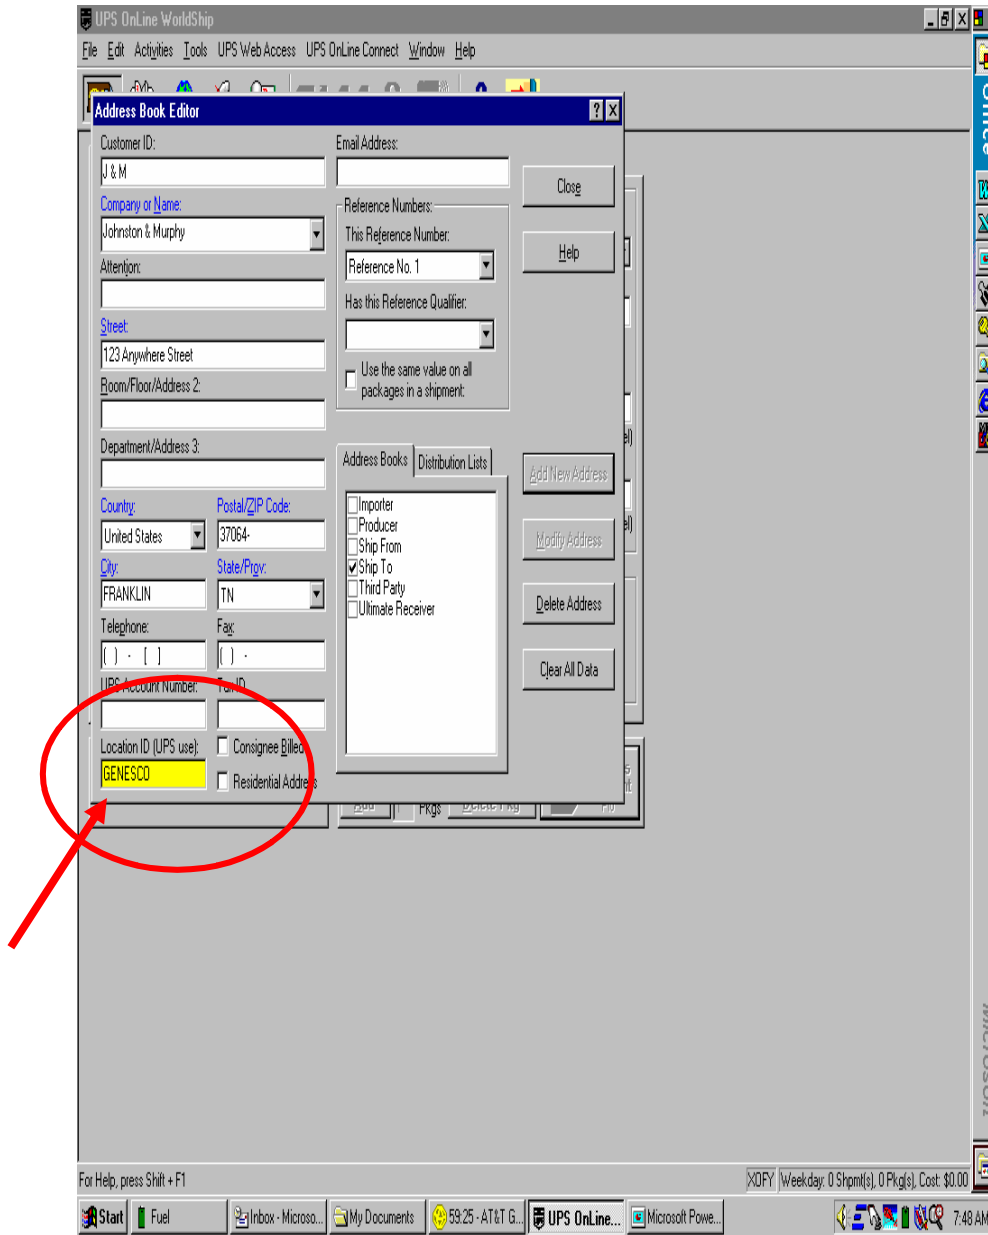

How to edit address book
to include **location ID**

Select Tools, then Address Book Editor

Select Address to be modified, key GENESCO (all caps) in **Location ID Field**

Click Modify Address, this will now save Location ID for this customer.
